

Vitor Martinho

Senior Microsoft Fabric & BI Engineer | AI-Augmented Data Platform Developer

Goiânia, Brazil (GMT-3, fully remote) · +55 (62) 9 8131-3003 · vitordibm@gmail.com · linkedin.com/in/vitor-dib

PROFESSIONAL SUMMARY

Senior BI & Data Engineer with 7+ years building modern data platforms, currently delivering Microsoft Fabric architecture and analytics infrastructure as a contractor for Microsoft. Deep hands-on expertise across the Fabric stack (Lakehouse, Tabular/Semantic Models, Data Pipelines, Notebooks, Direct Lake) and the Azure data ecosystem (ADLS Gen2, Azure Data Factory, Synapse, Azure Data Explorer/ADX, Entra ID, Azure DevOps), with strong PySpark and T-SQL at scale. Works as an AI-augmented engineer — orchestrating coding agents (GitHub Copilot, Cursor, Claude, Gemini) inside VS Code to accelerate development, API integrations, and pipeline delivery, plus NotebookLM for knowledge synthesis. Fluent English (C1) with full autonomy in remote, international teams.

CORE SKILLS

- **Microsoft Fabric & Azure:** Fabric (Lakehouse, Warehouse, Tabular/Semantic Models, Data Pipelines, Notebooks, Direct Lake, Fabric Git integration), Azure Data Factory, ADLS Gen2, Synapse Analytics, Azure Data Explorer (ADX/KQL), Entra ID, Azure DevOps.
- **AI-Augmented Development (Agentic):** Coding agents used in-workflow (not as chat): GitHub Copilot, Cursor, Claude, Gemini, NotebookLM — for code generation & refactoring, API integrations, pipeline scaffolding, test generation, and technical documentation.
- **Data Engineering & Architecture:** Databricks, dbt, Medallion architecture (Bronze/Silver/Gold), ETL/ELT pipelines, Apache Spark (PySpark), CI/CD & version control (Azure DevOps, GitHub), API integrations (REST/SOAP, OAuth).
- **Analytics & Business Intelligence:** Power BI (Advanced DAX & M), Tableau, Star Schema modeling, data storytelling, UX/UI for analytics, AI-driven demand forecasting, Python (Pandas, Scikit-learn).
- **Programming & Databases:** C# / .NET, SQL / T-SQL, Python, VBA, JavaScript, Java. Engines: SQL Server, Synapse, MySQL, Postgres, Azure Data Explorer (KQL).
- **Languages:** English — Fluent (C1) | Portuguese — Native | Spanish — Fluent.

EXPERIENCE

Senior Fabric / BI Engineer (Contractor)

Microsoft | 2025 – Present

- **Microsoft Fabric architecture:** Designed and implemented the Fabric Workspace architecture and scalable Tabular/Semantic Data Models for an internal Microsoft team, replacing legacy ad-hoc workflows.
- **Cross-domain data unification:** Consolidated disparate sources (Splunk, Azure Data Explorer/ADX, Costa) into a governed Fabric Lakehouse, enabling correlation across previously siloed domains (e.g., Infrastructure vs. CRM).
- **Pipeline optimization:** Re-engineered ingestion pipelines and semantic models to resolve capacity bottlenecks and cut dashboard latency.
- **AI-ready foundation:** Restructured the data platform for predictive modeling and future AI integrations, establishing a single, reliable analytics layer.
- **AI-augmented delivery:** Accelerated notebook/PySpark development and API integrations using coding agents (GitHub Copilot, Cursor, Claude) directly in VS Code.

Business Intelligence Tech Lead

NuvemShop (Tiendanube) | 2025 – 2026

- **Product analytics leadership:** Led a multicultural, fully remote team (Brazil/Argentina), fostering autonomy and aligning data strategy with the Core and Growth tribes.
- **Analytics engineering (dbt/Databricks):** Architected and built the Data Warehouse Gold Layer, establishing a reliable single source of truth and strong data-governance standards.
- **BI architecture (Tableau):** Redesigned the visualization data model with a Star Schema, significantly improving dashboard performance and scalability for decision-making.

Business Intelligence Tech Lead

Axia Agro | 2024 – 2025

- **Data governance:** Defined and maintained data-quality and consistency standards across multiple systems and platforms.
- **Advanced analytics:** Delivered real-time credit-scoring, sales-commission tracking, and pricing-transparency solutions.
- **Workflow automation:** Built automated data workflows with Power Automate and RESTful APIs (IBGE, Senior, Microsoft Graph, Adobe), sharply reducing manual processes.

- **Databricks migration:** Contributed to migrating pipelines to Databricks, using PySpark to build scalable ETL — driving a 60% reduction in platform costs through tool consolidation.

Data Specialist

AgroGalaxy | 2021 – 2024

- **Commercial Excellence Project:** Led the initiative, building data-management processes that streamlined customer-service operations.
- **AI-driven scheduling:** Implemented AI tools for order-input scheduling, improving order-processing time by 60%.
- **KPI framework:** Established performance KPIs from N1 to C-level, contributing to a 118% increase in sales-team productivity.
- **System integration:** Connected CRM and ERP systems to BI tools via APIs, ensuring real-time data synchronization.

Senior Data Analyst

Adubos Araguaia | 2019 – 2021

- Analyzed and tracked sales performance, delivering insights that helped increase year-over-year revenue by 207%.
- Developed a suite of calculation tools that supported the opening of 9 new stores and 1 manufacturing facility.

EDUCATION

Universidade Federal de Goiás

Postgraduate — Databases for Big Data | 2023 – 2024

Advanced database management, big-data frameworks, and data processing (PySpark, GitHub, RDBMS).

Massachusetts Institute of Technology (MIT)

Short-Term Program — Data Science & Big Data | 2022

Data-science methodologies, big-data analytics, and machine-learning applications.

Fundação Getúlio Vargas (FGV)

Postgraduate — Business Administration | 2020 – 2022

Strategic planning, financial analysis, and project management informing data-driven leadership.

Universidade Federal de Goiás

B.Sc. — Civil Engineering | 2014 – 2019

Problem-solving, analytical thinking, and project management for data-oriented roles.

CERTIFICATIONS & ACHIEVEMENTS

- **Power BI World Championship 2025** — award-winning dashboard design (competitor).
- **Top 5 — Excel World Championship, Brazil** — FMWC-recognized spreadsheet engineering.
- **1st Place — IEL Internship Award, 2019.**
- **Public Speaking & Communication Training** — Vox2U, 2020–2021.
